Do you want to be the one who is lucky enough [DAS-C01 Exam Training](#) to be exempted from the strains and tensions of the approaching exam, If you have experienced a very urgent problem while using C_THR96_2005 exam simulating, you can immediately contact online customer service.

NEW QUESTION: 1

CORRECT TEXT

On your system exists a file that is described as a map file that is used to update the MBR or first sector of the partition with the appropriate booting information. Type the full path and name of the file.

Answer:

Explanation:
/etc/lilo.conf

NEW QUESTION: 2

Which Log Cache profile provides the best performance for workloads with high random I/O such as visualization?

- A. Striped
- B. Single-parity RAID
- C. Mirrored
- D. Double-parity RAID

Answer: A

NEW QUESTION: 3

HOTSPOT

Project Scenario

Calendar Project (Note: The companies and people within the scenario are fictional.)

There has been a reduction in the number of orders at the MNO Manufacturing Company due in part to the increased marketing activities of its competitors. To help counter this, the company has decided to create a promotional calendar for next year for all its current and prospective customers. The end product of this project will be a prepared calendar pack, ready for printing. The design of the calendar will be similar to one sent out previously, and must reflect the company image as described in the existing corporate branding standards. Another project is currently producing a new company logo when it is to be printed on each page of the promotional calendar. The prepared calendar pack will consist of:

- Design for each month - correctly showing all public holidays and new company logo
- Selected photographs - 12 professionally-produced photographs, showing different members of staff
- Selected paper and selected envelope - for printing and mailing the calendar

Chosen label design - a competition to design a label will be held as part of this project

List of customers - names and addresses of customers to whom the calendar will be sent.

The project is currently in initiation and will have two further stages:

Stage 2 will include the activities to:

Create the customer list using information from the Accounts and Marketing departments

-- -

---- --

Confirm compliance with the Data Protection Legislation

Create a design for each month - this will be done by the internal creative team

Select and appoint a professional photographer

Gather photograph design ideas from previous project and agree

photographic session schedule Prepare a production cost forecast Select paper and envelope.

Stage 3 will include the activities to:

Produce and select tie professionally-taken photographs Hold the label design competition and choose the label design Assemble the prepared calendar pack.
A production cost forecast, based on the options and costs for the paper, envelope, printing and marketing of the calendar is to be produced in stage 2. However, the actual production and distribution of the calendars is not within the scope of the project. The product cost forecast will be reviewed by the Project Board to determine whether tie project should continue. It is now 05 October and the prepared calendar pack must be delivered to the print company by 30 November, to enable printing and distribution of the calendar in time for Christmas. The cost of the activities to develop the specialist products and the cost of the project management activities are estimated to be (GBP)20,000. There is a project time tolerance of +1 week /-2 weeks and a project cost tolerance of +(GBP)6,000 / -(GBP)6,000. A change budget of (GBP)500 has been allocated but there is no risk budget.
Lines 1 to 6 in the table below consist of an assertion statement and a reason statement For each line identify the appropriate option, from options 1 to 6, that applies. Each option can be used once, more than once or not at all.

Answer:

Explanation:

NEW QUESTION: 4

Identify two kinds of information that can be stored in an SDO_GEORASTER object.

- A. any changes detected in a raster object
- B. the blocks of a raster object
- C. the name of the raster's RDT (raster data table)
- D. raster cell data
- E. the spatial extent of a raster object

Answer: D,E

Explanation:

A: The core data in a raster is a multidimensional matrix of raster cells.

C: The spatial extent (footprint) of a GeoRaster object is part of the metadata, but it is stored separately as an attribute of the GeoRaster object.
