NEW QUESTION: 1

Which of the following is not a factor, with respect to pending litigation that must be considered in determining whether a provision should be recognized?

- A. The probability of an unfavorable outcome.
- B. The time period in which the underlying cause of action occurred.

C. The ability to make a reliable estimate of the amount of loss.

D. The number of parties involved in the litigation.

Answer: D

Explanation:

The number of parties involved in the litigation is irrelevant. For example, the same accounting treatment is applied whether a claim is brought by an individual or in a class action suit.

OSPF peers.

B. The default route will become unavailable and will no longer be advertised to your OSPF peers.

C. The default route will remain active and will continue to be advertised to your OSPF peers.

D. The default route will remain active and will "blackhole" all traffic from your OSPF peers.

Answer: B

NEW QUESTION: 3

Which of the following is a side effect of extensive usage of swap space?

A. Since processes always exist completely in either RAM or swap, regular RAM may become unused if the kernel does not move

processes back from the swap space to memory.

B. Applications need to restart because their virtual memory addresses change to reflect memory relocation to the swap address area.

C. The memory may become fragmented and slow down the access to memory pages.

However, this can be kept to a minimum by the regular use of memfrag -d.

D. The overall system performance may degrade because of heavy hard disk use and memory reorganization.

E. The root filesystem may become full because swap space is always located on the system root partition.

Answer: D
