NEW QUESTION: 1

Which of the following is a benefit of using a problem management system?

- A. It reduces the number of incidents.
- B. It helps to identify the root cause of incidents.
- C. It helps to identify the impact of incidents.
- D. It helps to identify the likelihood of incidents.

Answer: C

Explanation:

Explanation

What is problem management?

The purpose of problem management is to reduce the likelihood and impact of incidents by identifying actual and potential causes of incidents, and managing workarounds and known errors. Problems are related to incidents, but it is important to differentiate them in the way they are managed:

* Incidents have an impact on users or business processes, and

must be resolved so that normal business activity can take place.

* Problems are the causes of incidents therefore they require investigation and analysis to identify the causes, develop workarounds, and recommend longer-term resolution. This reduces the number and impact of future incidents.

NEW QUESTION: 2

- A. Option A
- B. Option D
- C. Option B
- D. Option C

Answer: A

NEW QUESTION: 3

What feature can monitor battery state and full screen awareness?
