NEW QUESTION: 1

A company has updated the method it uses to initiate projects. The company requires RFPs from three vendors, and low and high bids must be rejected to determine the selected vendor. Which of the following terms describe this requirement?

- A. Business process change
- B. Internal reorganization
- C. Business acquisition
- D. Outsourcing

Answer: D

Explanation:

Explanation/Reference:

References: Kim Heldman, *CompTIA Project+ Study Guide, 2nd Edition*, Sybex, Indianapolis, 2017, p. 297

NEW QUESTION: 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You develop and deploy an Azure App Service API app to a Windows-hosted deployment slot named Development. You create additional deployment slots named Testing and Production. You enable auto swap on the Production deployment slot.

You need to ensure that scripts run and resources are available before a swap operation occurs.

Solution: Update the web.config file to include the applicationInitialization configuration element.

Specify custom initialization actions to run the scripts.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Specify custom warm-up.

Some apps might require custom warm-up actions before the swap. The applicationInitialization configuration element in web.config lets you specify custom initialization actions. The swap operation waits for this custom warm-up to finish before swapping with the target slot. Here's a sample web.config fragment.

```
<system.webServer>
```

```
<applicationInitialization>
```

```
<add initializationPage="/" hostname="[app hostname]" />
```

```
<add initializationPage="/Home/About" hostName="[app
hostname]" />
</applicationInitialization>
</system.webServer>
```

NEW QUESTION: 3

A customer has purchased a new VMAX and is in the process of setting up Open Replicator for a migration. What is a consideration for device pairing for the migration?

- A. New devices must be of the same RAID type.
- B. New device must be the same size or larger.
- C. New Device must be the same size or smaller.
- D. New Device must be of the same Meta Configuration.

Answer: B
