NEW QUESTION: 1

Which of the following is not correct about Fit/Gap Analysis?
There are 2 correct answers to this question.

Response:

- A. Drive towards adopting customers processes.
- B. Minimize the needs for rework during realization.
- C. Validate pre-activate and pre-assembled solution in the development system.
- D. Prioritize delta requirement and gaps.

Answer: A,C

NEW QUESTION: 2

You administer a Microsoft SQL Server Master Data Services (MDS) model. All model entity members have passed validation. The current model version should be committed to form a record of master data that can be audited and create a new version to allow the ongoing management of the master data. You lock the current version. You need to manage the model versions.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area, and arrange them in the correct order.

Answer:

Explanation:

Explanation

Box 1: Validate the current version.

In Master Data Services, validate a version to apply business rules to all members in the model version.

You can validate a version after it has been locked.

Box 2: Commit the current version.

In Master Data Services, commit a version of a model to prevent changes to the model's members and their attributes. Committed versions cannot be unlocked.

Prerequisites:

Box 3: Create a copy of the current version.

In Master Data Services, copy a version of the model to create a new version of it.
