NEW QUESTION: 2

A staff auditor, nearly finished with an audit engagement, discovers that the director of marketing has a gambling habit. The gambling issue is not directly related to the existing engagement and there is pressure to complete the current engagement. The auditor notes the problem and forwards the information to the chief audit executive but performs no further follow-up. The auditor's actions would:

I. Be in violation of the IIA Code of Ethics for withholding meaningful information.

II.

Be in violation of the Standards because the auditor did not properly follow up on a red flag that might indicate the existence of fraud.

III.

Not be in violation of either the IIA Code of Ethics or Standards.

A. I only.

B. II only.

C. III only.

D. I and II only.

Answer: C

NEW QUESTION: 3

You need to create relationships to meet the reporting requirements of the customer service department.

What should you create?

A. an additional date table named ShipDate, a many-to-many relationship from Sales[sales_date_id] to Date[date_id], and a many-to-many relationship from Sales[sales_ship_date_id] to ShipDate[date_id]

B. a one-to-many relationship from Sales[sales_date_id] to Date[date_id] and a one-to-many relationship from Sales[sales_ship_date_id] to Date[date_id]

C. a one-to-many relationship from Date[date_id] to Sales[sales_date_id] and another one-to-many relationship from Date[date_id] to Weekly>Returns[week_id]

D. an additional date table named ShipDate, a one-to-many relationship from Sales[sales_date_id] to Date[date_id], and a one-to-many relationship from Sales[sales_ship_date_id] to ShipDate[date_id]

E. a one-to-many relationship from Date[date_id] to

Sales[sales_date_id] and another one-to-many relationship from Date[date_id] to Sales[sales_ship_date_id]

Answer: D

Explanation:

Scenario: The customer service department requires a visual that can be filtered by both sales month and ship month independently.

Reference:

<https://docs.microsoft.com/en-us/power-bi/transform-model/desktop-relationships-understand> Overview This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

NEW QUESTION: 4

A shard is a unit of data. How many copies does each Cisco APIC shard have including the active shard?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: E

Explanation:

Reference:
