Answer: A,D

NEW QUESTION: 3

You plan to deploy logical Azure SQL Database servers to The East US Azure region and the West US Azure region. Each server will contain 20 databases accessed by a different user who reads in a different on-premises location. The databases will be configured to use active geo-replication.

You need to recommend a solution that meets the following requirement!;

- * Restricts user access to each database
 - * Restricts network access to each database based on each user's respective location
 - * Ensures that the databases remain accessible from down applications if the local Azure region fails
- What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 4
