Adventure with security of your Money, You can enjoy your learning [Hitachi Vantara Certified Specialist - Enterprise Storage Installation](#) process at any place and any time as long as you have used once in an online environment, Always stand behind our products.

NEW QUESTION: 1

You are evaluating the implementation of Exchange Server 2010 SP1 Edge Transport servers and Hub Transport servers in adatum.com.

You need to recommend a solution to ensure that the Exchange Server 2010 SP1 servers can queue email messages for humongousinsurance.com.

What should you include in the recommendation?

Case Study Title (Case Study): Datum Corporation

Company Overview

A, Datum Corporation is a leading insurance company.

Physical Locations

A, Datum has a main office in Tokyo and a manufacturing plant in Bangkok. The offices connect to each other by using a heavily congested high-speed WAN link. Each office has a dedicated connection to the Internet. Research and development

personnel are located in both the Tokyo office and the Bangkok office.

Existing Environment

Active Directory Environment

A, Datum has an Active Directory forest that contains one domain named adatum.com. The Active Directory forest has the following configurations:

- An Active Directory site exists for each office.
- All domain controllers run Windows Server 2003 x86 Service Pack 2 (SP2).
- The functional level of the forest and the domain is Windows Server 2003 interim.
- All of the user accounts for the users in the Tokyo office are located in an organizational unit (OU) named Users\Tokyo.
- All of the user accounts for the users in the Bangkok office are located in an organizational unit (OU) named Users\Bangkok. Each office has a human resources team. The human resources team in each office is responsible for managing all of the users in its respective office.

Messaging Environment

A, Datum has an Exchange Server 2003 Service Pack 2 (SP2) organization that has the following configurations:

- A 375-MB mailbox quota for all users
- An SMTP connector that has the following configurations:
 - Address space: *
 - Delivery: DNS
 - Local bridgehead: TOK-BE-1

A, Datum has a partner company named Humongous Insurance. The A, Datum Exchange servers are configured as ETRN servers for humongousinsurance.com. The Exchange organization contains six servers. The servers are configured as shown in the following table.

Requirements Business Goals

A, Datum has the following business goals:

- Minimize hardware costs.
- Minimize administrative effort.
- Minimize WAN link utilization between the two offices.

Planned Changes

A, Datum plans to migrate to Exchange Server 2010 Service Pack 1 (SP1). Each office will contain Exchange servers.

You plan to deploy a Hub Transport server named TOK-HUB-1 in the Tokyo site.

You plan to deploy a Hub Transport server named BAN-HUB-1 in the Bangkok site.

Archiving Requirements

Email messages that are older than 200 days must be moved automatically to a distinct mailbox database.

Security Requirements

A, Datum must meet the following security requirements:

- Anti-spam filtering must be performed on all email messages

before the messages enter the network.

-The human resources teams must be allowed to modify only the user accounts of the users in their respective office.

-The number of permissions assigned to the members of a group named Exchange Secondary Support Staff must be minimized.

Redundancy Requirements

A, Datum must meet the following redundancy requirements:

-A copy of all the mailbox databases must exist in both sites.

-The impact on users must be minimized if a single server fails.

-Users must be able to send and receive email messages if a single server fails.

-All of the mailbox databases must be available if the WAN link fails between the offices.

Problem Statements

The WAN link between the Tokyo office and the Bangkok office is heavily congested. During normal business hours, the average round-trip time for packets to travel across the WAN link is 185 ms. The portable computer of the manager of the finance department recently experienced a hard disk failure. The hard disk failure resulted in the loss of more than three years of email.

- A. a retention policy
- B. an authoritative domain
- C. a remote domain
- D. an external relay domain

Answer: D

NEW QUESTION: 2

When the NAT server is configured on the USG system firewall, a server-map table is generated. Which of the following does not belong to the content in the performance?

- A. Destination port number
- B. Source IP
- C. Destination IP
- D. Protocol number

Answer: B

NEW QUESTION: 3

A security analyst is investigating malicious traffic from an internal system that attempted to download proxy avoidance software as identified from the firewall logs but the destination IP is blocked and not captured. Which of the following should the analyst do?

- A. Shut down the computer
- B. Review the network logs.
- C. Determine if DNS logging is enabled.
- D. Take a snapshot
- E. Capture live data using Wireshark

Answer: A
