NEW QUESTION: 4

Scenario: A company is using Amazon CloudTrail to monitor AWS API calls. The company wants to ensure that all API calls are logged, including those made by the AWS CLI. The company also wants to ensure that the logs are stored in a secure and durable location. The company is considering the following options:

A. AWS Config
CloudTrail logs API calls, but it does not log calls made by the AWS CLI. AWS Config provides a centralized view of configuration changes across all AWS resources. It can be used to monitor configuration changes and generate alerts. However, it does not provide a secure and durable storage for logs.

B. Amazon CloudTrail
Amazon CloudTrail provides a centralized view of configuration changes across all AWS resources. It can be used to monitor configuration changes and generate alerts. However, it does not provide a secure and durable storage for logs. Amazon CloudTrail also provides a secure and durable storage for logs. The logs are stored in Amazon S3, which is a secure and durable storage service.

C. Amazon Inspector
Inspector is a service that automatically assesses the security and compliance of your AWS resources. It can be used to identify security vulnerabilities and generate alerts. However, it does not provide a secure and durable storage for logs.
