You plan to query db3 to retrieve a list of sales customers. The query will retrieve several columns that include the email

address of each sales customer.

You need to modify db3 to ensure that a portion of the email addresses is hidden in the query results.

To complete this task, sign in to the Azure portal.

**Answer:**

Explanation:

See the explanation below.

Explanation

1. Launch the Azure portal.

2. Navigate to the settings page of the database db3 that includes the sensitive data you want to mask.

3. Click the Dynamic Data Masking tile that launches the Dynamic Data Masking configuration page.

Note: Alternatively, you can scroll down to the Operations section and click Dynamic Data Masking.

4. In the Dynamic Data Masking configuration page, you may see some database columns that the recommendations engine has flagged for masking.

5. Click ADD MASK for the EmailAddress column

6. Click Save in the data masking rule page to update the set of masking rules in the dynamic data masking policy.
