Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure subscription named Subscription1.

Subscription1 contains a resource group named RG1.

RG1 contains resources that were deployed by using templates.

You need to view the date and time when the resources were created in RG1.

Solution: From the Subscriptions blade, you select the subscription, and then click Programmatic deployment.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Explanation

From the RG1 blade, click Deployments. You see a history of deployment for the resource group.

Through activity logs, you can determine:

- * what operations were taken on the resources in your subscription
 - * who started the operation
 - * when the operation occurred
 - * the status of the operation
 - * the values of other properties that might help you research the operation
- On the Azure portal menu, select Monitor, or search for and select Monitor from any page

2. Select Activity Log.

3. You see a summary of recent operations. A default set of filters is applied to the operations. Notice the information on the summary includes who started the action and when it happened.
