resources and enhance security. SDP includes three components:
An SDP client on the connecting asset (e.g. a laptop).
* The SDP controller for authenticating and authorizing SDP clients and configuring the connections to SDP gateways.
* The SDP gateway for terminating SDP client network traffic and enforcing policies in communication with the SDP controller. Reference: CSA Security Guidelines V.4 (reproduced here for the educational purpose)

NEW QUESTION: 2

You need to modify the entity form to resolve the customer request number issue.
What should you do?

- A. Change the data type of the customer request number field to Autonumber
- B. Use a calculated field
- C. Change the data type of the customer request number field to Lookup

Answer: A

Explanation:

Scenario: Users report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number.

Autonumber columns are columns that automatically generate alphanumeric strings whenever they are created.

NEW QUESTION: 3

A user reports their laptop is shutting down each time they are idle for a short period of time. Which of the following options would the technician use to remedy the issue?

- A. System Performance
- B. Disk Management
- C. Power Options
- D. Display

Answer: C

NEW QUESTION: 4

Which three tools can be used to define the balanced and effective territories before finalizing the territory structure?

- A. Graphs
- B. Dimensions
- C. Metrics
- D. Proposals

E. Territory Team Members

Answer: A,B,D

Explanation:

D: Oracle Fusion Territory Management enables sales executives to quickly create multiple territory proposals in order to conduct "what if" analysis and evaluate the pros and cons of different territory structures. It will identify any gaps or overlaps in territory coverage and preview how accounts, opportunities and leads will be assigned based on the new proposals.
