The second half of the sentence gives more clues, so you ought to start here. What are cats most likely to do to dogs? Avoid them, probably--which will lead you to (E), the correct answer. But for good measure, let's eliminate the other possibilities. For a cat to undermine a dog isn't logical. Being undermined is something that happens to humans or projects, so you can definitely eliminate (D). One could say that a cat enticed a dog to do something, but it isn't good usage simply to say that the cat enticed the dog. Eliminate (A). Is it likely for a cat to gracefully apprehend a dog? No. Eliminate (C).
