NEW QUESTION: 1

What conclusion is most correct about the Experimental Design shown here with the response in the far right column?

- A.** No factor has enough statistical confidence greater than 95% to have an impact on the response rate
- B.** This design does not have enough experimental runs to conclude anything as evidenced by the lack of P-values in the MINITABTM output
- C.** If the Adv is increased from the low level to the high level, the response rate increases
- D.** The response level is statistically concluded to only need the Adv and Bev factors set at the low level to get the largest response rate
- E.** Constant, Adv and Bev are the only factors statistically affecting the response rate with 95% confidence or more

Answer: D
