Explanation:

The Router ID (RID) is an IP address used to identify the router and is chosen using the following sequence:

+

The highest IP address assigned to a loopback (logical) interface. + If a loopback interface is not defined, the highest IP address of all active router's physical interfaces will be chosen.

+

The router ID can be manually assigned In this case, because a loopback interface is not configured so the highest active IP address

192.168.0.1 is chosen as the router ID.
