## NEW QUESTION: 2

Sie müssen eine Funktions-App mit dem Namen corp7509086n1 erstellen, die Sticky-Sessions unterstützt. Die Lösung muss die mit Azure verbundenen Kosten des App Service-Plans minimieren.

Was sollten Sie über das Azure-Portal tun?

**A.** Schritt 1:

Wählen Sie die Schaltfläche Neu in der oberen linken Ecke des Azure-Portals aus und wählen Sie dann Berechnen > Funktionsanwendung aus.

Schritt 2:

Verwenden Sie die Funktions-App-Einstellungen wie unten aufgeführt.

App-Name: corp7509088n1

Hosting-Plan: Azure App Service-Plan

(brauche das für die Sticky Sessions)

Preisstufe des App Service-Plans: Shared Compute: Kostenlos

Schritt 3:

Wählen Sie Erstellen, um die Funktions-App bereitzustellen und bereitzustellen.

**B.** Schritt 1:

Wählen Sie die Schaltfläche Neu in der oberen linken Ecke des Azure-Portals aus und wählen Sie dann Berechnen > Funktionsanwendung aus.

Schritt 2:

Verwenden Sie die Funktions-App-Einstellungen wie unten aufgeführt.

App-Name: corp7509086n1

Hosting-Plan: Azure App Service-Plan

(brauche das für die Sticky Sessions)

Preisstufe des App Service-Plans: Shared Compute: Kostenlos

Schritt 3:

Wählen Sie Erstellen, um die Funktions-App bereitzustellen und bereitzustellen.

**Answer: B**

Topic 6, A Datum Corporation

Overview

ADatum Corporation is a financial company that has two main offices in New York and Los Angeles. ADatum has a subsidiary

named Fabrikam, Inc. that shares the Los Angeles office. ADatum is conducting an initial deployment of Azure services to host new line-of-business applications and is preparing to migrate its existing on-premises workloads to Azure. ADatum uses Microsoft Exchange Online for email.

#### On-Premises Environment

The on-premises workloads run on virtual machines hosted in a VMware vSphere 6 infrastructure. All the virtual machines are members of an Active Directory forest named adatum.com and run Windows Server 2016.

The New York office an IP address of 10.0.0.0/16. The Los Angeles office uses an IP address space of 10.10.0.0/16.

The offices connect by using a VPN provided by an ISP. Each office has one Azure ExpressRoute circuit that provides access to Azure services and Microsoft Online Services. Routing is implemented by using Microsoft peering.

The New York office has a virtual machine named VM1 that has the vSphere console installed.

#### Azure Environment

You provision the Azure infrastructure by using the Azure portal. The infrastructure contains the resources shown in the following table.

AG1 has two backend pools named Pool11 and Pool12. AG2 has two backend pools named Pool21 and Pool22.

#### Planned Changes

ADatum plans to migrate the virtual machines from the New York office to the East US Azure region by using Azure Site Recovery.

#### Infrastructure Requirements

ADatum identifies the following infrastructure requirements:

- \* A new web app named App1 that will access third-parties for credit card processing must be deployed.
- \* A newly developed API must be implemented as an Azure function named App2. App2 will use a blob storage trigger. App2 must process new blobs immediately.
- \* The Azure infrastructure and the on-premises infrastructure and the on-premises infrastructure must be prepared for the migration of the VMware virtual machines to Azure.
- \* The sizes of the Azure virtual machines that will be used to migrate the on-premises workloads must be identified.
- \* All migrated and newly deployed Azure virtual machines must be joined to the adatum.com domain.
- \* AG1 must load balance incoming traffic in the following manner:
  - \* <http://corporate.adatum.com/video/> will be load balanced across Pool11.
  - \* <http://corporate.adatum.com/images/> will be load balanced across Pool12.
- \* AG2 must load balance incoming traffic in the following manner:
  - \* <http://www.adatum.com> will be load balanced across Pool21.
  - \* <http://www.fabrikam.com> will be load balanced across Pool22.

- \* ER1 must route traffic between the New York office and the platform as a service (PaaS) services in the East US Azure region, as long as ER1 is available.
- \* ER2 must route traffic between the Los Angeles office and the PaaS services in the West US region, as long as ER2 is available.
- \* ER1 and ER2 must be configured to fail over automatically.

Application Requirements

App2 must be able to connect directly to the private IP addresses of the Azure virtual machines. App2 will be deployed directly to an Azure virtual network.

Inbound and outbound communications to App1 must be controlled by using NSGs.

Pricing Requirements

ADatum identifies the following pricing requirements:

- \* The cost of App1 and App2 must be minimized.
- \* The transactional charges of Azure Storage account must be minimized.

**NEW QUESTION: 3**

DRAG DROP  
DRAG DROP

**Answer:**

Explanation:

Explanation:

Target 1: ClaimsIdentity

Target 2: ClaimType

Target 3: ClaimTypes

Target 4: ClaimType

Example: public class MyIdentityClaim

```
{
private string _identityProvider;
private string _identityValue ;
public const string ACSProviderClaim =
"http://schemas.microsoft.com/accesscontrolservice/2010/07/claims/identityprovider"; public MyIdentityClaim(IClaimsIdentity
identity)
{
if (identity != null)
{
foreach (var claim in identity.Claims)
{
if (claim.ClaimType == ClaimTypes.NameIdentifier)
{
```

```
_identityValue = claim.Value;
}
if (claim.ClaimType == ACSProviderClaim)
{
_identityProvider = claim.Value;
}
}
}
```
