Real-time processing must be monitored to ensure that workloads are sized properly based on actual usage patterns. The sales data including the documents in JSON format, must be gathered as it arrives and analyzed online by using Azure Stream Analytics. Streaming Units (SUs) represents the computing resources that are allocated to execute a Stream Analytics job. The higher the number of SUs, the more CPU and memory resources are allocated for your job. This capacity lets you focus on the query logic and abstracts the need to manage the hardware to run your Stream Analytics job in a timely manner.
