"Pass Any Exam. Any Time." - www.actualtests.com

- A. Option D
- B. Option B
- C. Option A
- D. Option C

Answer: A

NEW QUESTION: 3

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named Private.txt in a folder named Folder1 on the C drive of Client2.

You need to encrypt Private.txt and ensure that a user named User1 can view the contents of Private.txt.

To complete this task, sign in to the required computer or computers.

A. After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.

* On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click OK.

* A window will pop up asking you whether or not you want to encrypt the file and its parent folder. Select the "Encrypt the file only" and click OK.

* Private.txt will now show its file name in green color.

* Right-click Private.txt and then select Properties.

* Click Advanced on the General tab.

* Click Details on the Advanced Attributes tab to open the User Access dialog box.

* Click Add to open the Encrypting File System dialog box and then select User1.

* Click OK to add User1 to the list of users who have access to the file.

* Click OK until you've exited out of the dialog boxes.

B. After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.

* On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click OK.

* A window will pop up asking you whether or not you want to encrypt the file and its parent folder. Select the "Encrypt the file only" and click OK.

* Private.txt will now show its file name in green color.

* Right-click Private.txt and then select Properties.

* Click Advanced on the General tab.

* Click OK to add User1 to the list of users who have access to the file.

* Click OK until you've exited out of the dialog boxes.

Answer: A
