Answer: D

NEW QUESTION: 3

when a customer submits a credit card dispute, the application connects to an external service to retrieve all transactions made by the customer. The external service returns transactions ordered by date of transaction, in a descending, chronological order. When a case worker reviews the dispute, the application displays the 10 most recent transactions.

If the case worker does not see the disputed transaction in the list, the case worker can search for additional transactions. The case worker can filter search results on transaction date, the transaction amount, or the merchant name. the search results display the 10 most recent transactions that satisfy the filter criteria. The case worker cannot paginate through the results.
