NEW QUESTION: 2

An enterprise based in the US produces an end product that is used with the unit of measure "pound" (LB).

The material is now to be marketed in the EU. A prerequisite for this is that the material can be sold with the unit "kilogram" (KG).

What is the easiest way to fulfill this requirement?

- A.** Define a unit of measure group that converts pounds to kilograms in the basic data customizing and assign it to the material master on basic data view 1.
- B.** Create a new material with a reference to the original material and assign the metric unit of measure to the new material master.
- C.** Add a conversion factor for converting pounds to kilograms on basic data view 1 in the material master.
- D.** There is no need to take any action. In this scenario, the conversion of units of measurements is done automatically.

Answer: D

NEW QUESTION: 3

You work as an Office Assistant for Peach Tree Inc. Your responsibility includes creating sales incentive report of all sales managers for every quarter. You are using Microsoft Excel to create a worksheet for preparing the report. You have inserted the sales figures of all sales managers as shown in the image given below:

You have to calculate the first quarter incentives for all sales managers. The incentive percentage (provided in cell B3) is fixed for all sales managers. The incentive will be calculated on their total first quarter sales. You have to write a formula in the cell F8. Then you will drag the cell border to the cell F12 to copy the formula to all the cells from F8 to F12. In the first step, you select the F8 cell. Which of the following formulas will you insert to accomplish the task?

- A.** =B3/100 * \$E\$8
- B.** =&B&3/100 * E8
- C.** =B3/100 * E8
- D.** =B3/100 * &E&8
- E.** =\$B\$3/100 * E8

Answer: E

Explanation:

In order to accomplish the task, you will have to insert the following formula: =\$B\$3/100 * E8 According to the question, the formula will be inserted in cell F8 and then the cell's border will be dragged to the F12 cell. Furthermore, the

incentive percentage is fixed for all sales managers and the value is provided in the cell B3. You will have to insert a formula that refers to the B3 cell as an absolute reference. For this you will have to type currency symbol (\$) before the row name and column number. In order to accomplish the task, type the following formula in the cell F8: $=\$B\$3/100 * E8$ When absolute reference is used for referencing a cell in a formula, dragging cell's border to another cell does not change the cell's reference. Answer options B and E are incorrect. This formula references the B3 cell as a relative reference.

After inserting the formula, when the cell's border is dragged, it will change the cell reference relatively.

Answer options A and C are incorrect. Ampersand symbol (&) is not used for referencing cells in Excel.
