Answer: B

NEW QUESTION: 2

Which is incorrect?

- A. 554 = DLIV
- B. 264 = CCLXIV
- C. 159 = CLVIIII
- D. 122 = CXXII

Answer: C

NEW QUESTION: 3

Which of the following is true about certificate expiration monitoring?

- A. Deletes the certificates after they are expired, but does not replace them.
- B. Must be run on the deployment manager.
- C. Must be run manually.
- D. Can replace expired certificates or certificates in the expiration threshold with a new certificate

Answer: D

Explanation:

Explanation/Reference:

Certificate monitor configuration settings can be configured on the administrative console by selecting Security > SSL certificate and key management > Manage certificate expiration. . On the Manage certificate expiration panel, you can perform the following functions.

Set the expiration threshold in the box labeled Expiration replacement threshold. The expiration

replacement threshold is the number of days before a certificate expiration that a certificate can be replaced and has a default value of 60 days.

Delete the certificates after they are replaced by selecting the Delete expiring certificates and signers

after replacement box. This box is selected by default.

Etc.
