Start studying now to further your IT networking career with a NCS-Core Mecatronica certification with our valid and useful resources!

NEW QUESTION: 1

How can an end user be defined as a manager in the CAR tool?

- A. Add the end user to the Standard CCM Manager group
- B. Enable an end user as a manager in the CAR tool
- C. Check the Manager check box in the LDAP directory
- D. Configure a Manager ID field in end user configuration

Answer: D

Explanation:

Any user can act as a CAR administrator (including application users); however, you must add the end user to the Cisco CAR Administrators User Group in Cisco Unified Communications Manager Administration (Standard CAR Admin Users). End users who have been identified as CAR administrators have full control over the CAR system. The administrator can modify all the parameters that relate to the system and the reports. End users who have not been identified as CAR administrators can access only designated CAR reports.

NEW QUESTION: 2

Which Web Services Security (WS-Security) specification negotiates how security tokens will be issued, renewed and validated? Click on the correct specification in the image below.

Answer:

Explanation:

Explanation

WS-Trust

The protocol used for issuing security tokens is based on WS-Trust. WS-Trust is a Web service specification that builds on WS-Security. It describes a protocol used for issuance, exchange, and validation of security tokens. WS-Trust provides a solution for interoperability by defining a protocol for issuing and exchanging security tokens, based on token format, namespace, or trust boundaries.
