However, some exams are so high-demanding [Reliable CIPM Dumps Ppt](#) that few of them can be got through easily.

NEW QUESTION: 1

You are tasked with migrating an online shopping website to Oracle Cloud Infrastructure (OCI) and decide to use a Load Balancer. You have configured the backend set with the round robin policy. During the testing phase, you noticed that users are losing items from their shopping carts when they navigate to different pages.

How should you implement a solution to this problem?

- A.** Set up a Traffic Management Steering Policy to redirect traffic to a different backend set that is deployed exclusively for the purpose of holding all Items placed in the shopping cart.
- B.** Replace the round robin policy with least connections policy at the backend set.
- C.** Set up session persistence at the Load Balancer backend set.
- D.** Configure a set of path route rules that will route to different backend sets based on the URI requested by the customer's browser.

Answer: B
