NEW QUESTION: 1

Your customer wants to acquire HPE OneView Advanced licenses for servers they plan to purchase in the future. They would like a pay-as-you-go approach in which they only pay for the licenses as they are used.

Which HPE licensing feature addresses this customer's request?

- A. Perpetual license
- B. GNU license
- C. Activation Key Agreement
- D. iLO Advanced

Answer: B

NEW QUESTION: 2

Users of HR schema complain about slower-than-normal performance. On investigation the DBA found that maintenance was recently performed on some of the tables. The DBA traced the query that takes longer than normal to execute.

View the Exhibit exhibit_before.

After the DBA resolves the problem, the query performs

normally.

View the Exhibit exhibit_after.

What action would the DBA have taken to resolve the performance problem?

- A. moved the EMPLOYEES table in to a locally managed tablespace
- B. moved the indexes associated with the EMPLOYEES table to the same tablespace where the EMPLOYEES table exists
- C. reorganized the associated indexes for the EMPLOYEES table that were in an unusable state
- D. analyzed the EMPLOYEES table to collect the current statistics
- E. moved the EMPLOYEES table to another location in the same tablespace

Answer: C

NEW QUESTION: 3

DRAG DROP

Your company, Coho Vineyard, uses Microsoft Exchange Online. Coho Vineyard employees have email addresses on the domain cohovineyard.com. Coho Vineyard recently purchased the domain cohowinery.com.

All employees of Coho Vineyard who work in the winery department should have an additional email address combining their current email alias with the domain cohowinery.com. Outgoing email messages must be sent from the existing cohovineyard.com email addresses.

You need to add the cohowinery.com email addresses.

Which three Windows PowerShell commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Answer :

Explanation:

Box 1:

Box 2:

Box 3:

Box 1: This command is used to return a list of users who work in the winery department and store the results in the \$Users variable.

Box 2: This command says for each user name, take the user's alias, prepend SMTP: and append @cohowinery.com and add the new address to any existing addresses

(\$_.EmailAddresses1. For example, for a user with an alias of John.Smith, the following email address would be created: SMTP: [\[email protected\]](#) That would then be added to his existing email address.

Box 3: The following PowerShell cmdlet can be used to define the email address for User1's mailbox:
Set-Mailbox -Identity user1 -EmailAddresses <list of email addresses>.
As Box 2 added the new @cohowinery.com address to the existing @cohowineyard.com address, we can use the \$_.EmailAddresses value with the -EmailAddresses parameter instead of manually listing the addresses.
