And they are pleased to give guide for 24 hours online.

NEW QUESTION: 1
DRAG DROP
You administer a Microsoft SQL Server database. Service accounts for SQL Agents are configured to use a local user. A Microsoft SQL Server Integration Services (SSIS) job step has been created within a SQL Server Agent job. The SSIS package accesses a network share when exporting data from a SQL Server database.
When you execute the SQL Server Agent job, it fails due to a permissions failure on a share on a remote server. You need to ensure that the SQL Server Agent job can execute the SSIS package. Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

NEW QUESTION: 2
DRAG DROP

Answer:
Explanation:

NEW QUESTION: 3
What is the definition of quality according to ISO 9000?
A. Quality is when the agreed service levels of a specific and
defined service are met during more then six subsequent
periods.
B. Quality is when the requirements and expectations of all
stakeholders involved in the product lifecycle are being
fulfilled.
C. Quality is when the expectations from the customer to a
certain service or product are being delivered to the customer.
D. Quality is when all features of a service which are agreed
with the customer are being delivered to the customer.
Answer: D

NEW QUESTION: 4
You need to create an Agent security role.
Which three actions should you recommend? Each correct answer
presents part of the solution.
NOTE: Each correct selection is worth one point.
A. Rename the Customer Service Representative role to Agents.
B. Name the new role Agents.
C. Copy the Microsoft Dataverse Basic User role.
D. Add security to the seat entity and assign users to the
Agents role.
E. Copy the Customer Service Representative role.
F. Add security to the Core Records and assign users to the
Customer Service Representative role.
Answer: B,E,F
Explanation:
Scenario: The security rule for agents must contain the
privileges in the default Customer Service Representative
security role.
Create a security role by Copy Role:

Step 1 (E): Copy the Customer Service Representative role.
Step 2 (F): Select the New Role Name.
Step 3: (B): When Copying Role is complete, navigate to each tab, ie Core Records, Business Management, Customization, etc. Set the privileges on each tab.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/create-edit-security-role This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.
To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.
At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.
