the exam.

Our training program includes simulation test before the **Valid NS0-176 Exam Duration** formal examination, specific training course and the current exam which has 95% similarity with the real exam.

Whether you are a student or an office worker, we believe you will not spend all your time on preparing for NS0-176 exam, Now you may feel ashamed, it's NS0-176 classroom training online and Mecatronica Network Appliance NS0-176 audio guide online are rightly designed to provide you an outstanding study for the exam and to take you towa To get things working well for you in the online Cisco and NetApp FlexPod Certified Professional NS0-176 Network Appliance video lectures go for none other than NS0-176 from Mecatronica online audio training and it's NS0-176 classroom training online and these tools are really having great time in the certification process.

Cisco and NetApp FlexPod Implementation and Administration Study Training Dumps Grasped the Core Knowledge of NS0-176 Exam

In addition, after receiving our goods, if you have any question about the renewal of the Cisco and NetApp FlexPod NS0-176 actual questions & answers, you can directly contact our experts and they will [NS0-176](#) do their best to deal with your problems and give the professional advice for your study.

It opens on all devices conveniently, Some tips & Notice, Therefore, there is no doubt that our Cisco and NetApp FlexPod NS0-176 latest pdf vce can be your right choice of passing the test in one time.

You will find that NS0-176 latest vce pdf are most thorough and the most accurate questions on the market and up-to-date practice test, If you take a fancy to the NS0-176 real exam dumps: Cisco and NetApp FlexPod Implementation and Administration but a little unsatisfactory about the original price (notwithstanding it is almost impossible), **Valid NS0-176 Exam Duration** you can pay attention to the period of special activity for the Cisco and NetApp FlexPod Implementation and Administration practice exam materials and free file during the period.

If our NS0-176 test dumps do not help you pass exam paper, we shall refund your money in full, We will solve your problem as soon as possible, We are ready to help you at any time.

We are so proud of helping our candidates go through NS0-176 real exam in their first attempt quickly, In a word, we just would like to ease your pressure.

NEW QUESTION: 1

What command instructs the device to timestamp Syslog debug messages in milliseconds?

- A. service timestamps debug datetime localtime<input type
- B. service timestamps log datetime msec
- C. service timestamps log datetime localtime<input type
- D. service timestamps debug datetime msec<input type

Answer: D

Explanation:

Enable millisecond (msec) timestamps using the service timestamps command:

```
router(config)#servicetimestamps debug datetime msec.  
router(config)#service timestamps log datetime msec
```

The "service timestamps debug" command configures the system to apply a time stamp to debugging messages. The time-stamp format for datetime is MMM DD HH:MM:SS, where MMM is the month, DD is the date, HH is the hour (in 24-hour notation), MM is the minute, and SS is the second. With the additional keyword msec, the system includes milliseconds in the time stamp, in the format HH:DD:MM:SS.mmm, where .mmm is milliseconds.

NEW QUESTION: 2

View the Exhibit and examine the structure of the PROMOTIONS table. Evaluate the following SQL statement:

The above query generates an error on execution.

Which clause in the above SQL statement causes the error?

- A. GROUP BY
- B. SELECT
- C. WHERE
- D. ORDER BY

Answer: A

NEW QUESTION: 3

- A. ipv6 enable
- B. ipv6 unicast-routing
- C. ip cef
- D. ip routing

Answer: B

NEW QUESTION: 4

SIMULATION

Scenario

You are the network security administrator for your organization. Your company is growing and a remote branch office is being created. You are tasked with configuring your

headquarters Cisco ASA to create a site-to-site IPsec VPN connection to the branch office Cisco ISR. The branch office ISR has already been deployed and configured and you need to complete the IPsec connectivity configurations on the HQ ASA to bring the new office online.

Use the following parameters to complete your configuration using ASDM. For this exercise, not all ASDM screens are active. Enable IKEv1 on outside I/F for Site-to-site VPN

Add a Connection Profile with the following parameters:

- Peer IP: 203.0.113.1
- Connection name: 203.0.113.1
- Local protected network: 10.10.9.0/24
- Remote protected network: 10.11.11.0/24
- Group Policy Name: use the default policy name supplied
- Preshared key: cisco
- Disable IKEv2
- Encryption Algorithms: use the ASA defaults

Disable pre-configured NAT for testing of the IPsec tunnel

- Disable the outside NAT pool rule

Establish the IPsec tunnel by sending ICMP pings from the Employee PC to the Branch Server at IP

address 10.11.11.20

Verify tunnel establishment in ASDM VPN Statistics > Sessions window pane

You have completed this exercise when you have successfully configured, established, and verified site-to-site IPsec connectivity between the ASA and the Branch ISR.

Topology

Answer:

Explanation:

Review the explanation for detailed answer steps.

Explanation/Reference:

Explanation:

First, click on Configuration -> Site-to-Site VPN to bring up this screen:

Click on "allow IKE v1 Access" for the outside per the instructions as shown below:

Then click apply at the bottom of the page. This will bring up the following pop up message:

Click on Send.

Next, we need to set up the connection profile. From the connection profile tab, click on "Add"

Then, fill in the information per the instructions as shown below:

Hit OK and you should see this:

To test this, we need to disable NAT. Go to Configuration -> Firewall -> NAT rules and you should see this:

Click on Rule 1 to get the details and you will see this:

We need to uncheck the "Enable rule" button on the bottom. It might also be a good idea to uncheck the "Translate DNS replies that match the rule" but it should not be needed.

Then, go back to the topology:

Click on Employee PC, and you will see a desktop with a command prompt shortcut. Use this to ping the IP address of 10.11.11.20 and you should see replies:

We can also verify by viewing the VPN Statistics -> Sessions and see the bytes in/out incrementing as shown below:
