**NEW QUESTION: 1**

A network administrator needs to find out what assets currently exist on the network. Third-party systems need to be able to feed host data into Cisco Firepower. What must be configured to accomplish this?

- A. a File Analysis policy to send file data into Cisco Firepower
- B. a Network Analysis policy to receive NetFlow data from the host
- C. a Network Discovery policy to receive data from the host
- D. a Threat Intelligence policy to download the data from the host

**Answer: C**

Explanation:

You can configure discovery rules to tailor the discovery of

host and application data to your needs.

The Firepower System can use data from NetFlow exporters to generate connection and discovery events, and to add host and application data to the network map.

A network analysis policy governs how traffic is decoded and preprocessed so it can be further evaluated, especially for anomalous traffic that might signal an intrusion attempt
