You should worry free purchasing, we guarantee our Okta-Certified-Administrator dumps PDF will help you pass exams and get Okta-Certified-Administrator certification successfully, if you fail exam we will full refund to you.

All exam candidates make overt progress after using our Okta-Certified-Administrator quiz torrent.

NEW QUESTION: 1

Regarding the main function of the router; which of the following statements are wrong? (Multiple Choice)

- A. Establish routing tables through multiple protocols
- B. Guide data forwarding according to the routing table
- C. Realize communication between devices on the same network segment
- D. Forward according to the source IP address of the received packet

Answer: C,D

NEW QUESTION: 2

Your manager has asked you to create various user objects using Windows PowerShell.

Which of the following must you do to accomplish this?

- A. Use the `objUser = new OUUser` statement
- B. Invoke the `Create` method of `OU`
- C. Use the `Create-User createUser`
- D. Use the `AddUser` method of `ADSL`

Answer: B

Explanation:

<http://www.mysmallcorneroftheweb.co.uk/programming-softwaredevelopment/powershell-creatingconfiguring-a-active-directory-user>
The user is created by first defining the `OU` and then invoking the `ou Create` method.

NEW QUESTION: 3

You need to create the new table for the vendor exclusion list. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Scenario: You must develop a new solution to maintain a Vendor

exclusion list for each customer and item combination. The solution must meet the following requirements:

- * Isolate all new vendor exclusion codes as a new assembly by creating a table named VendExclusions.
- * Create an index for the table named PrimaryIdx that uses the following fields: CustAccount, ItemId, VendAccount.
- * Ensure that users can open the Vendor Exclusion list report from the customer master form. The list must display the customer account, Item ID, and Vendor account fields.
- * Maintain referential integrity with other tables.

Box 1: a table extension for Vendors and relation for the Vendor exclusions
Box 2: Relationship Type Reference:

NEW QUESTION: 4

A company is implementing a publish-subscribe (Pub/Sub) messaging component by using Azure Service Bus. You are developing the first subscription application.

In the Azure portal you see that messages are being sent to the subscription for each topic. You create and initialize a subscription client object by supplying the correct details, but the subscription application is still not consuming the messages.

You need to complete the source code of the subscription client. What should you do?

A. `await subscriptionClient.CloseAsync();`

B. `subscriptionClient = new SubscriptionClient(ServiceBusConnectionString, TopicName, SubscriptionName);`

C. `subscriptionClient.RegisterMessageHandler(ProcessMessagesAsync, messageHandlerOptions);`

D. `await subscriptionClient.AddRuleAsync(new RuleDescription(RuleDescription.DefaultRuleName, new TrueFilter()));`

Answer: C

Explanation:

Using topic client, call RegisterMessageHandler which is used to receive messages continuously from the entity. It registers a message handler and begins a new thread to receive messages. This handler is waited on every time a new message is received by the receiver.

`subscriptionClient.RegisterMessageHandler(ReceiveMessagesAsync, messageHandlerOptions);` References:
