NEW QUESTION: 1
Your network contains an Active Directory domain named contoso.com.
Network Policy Server (NPS) is deployed to the domain.
You plan to deploy Network Access Protection (NAP).
You need to configure the requirements that are validated on the NPS client computers.
What should you do?

A. From a Group Policy object (GPO), configure the NAP Client Configuration security setting.
B. From the Network Policy Server console, configure a health policy.
C. From a Group Policy object (GPO), configure the Network Access Protection Administrative Templates setting.
D. From the Network Policy Server console, configure a network policy.
E. From the Network Policy Server console, configure a Windows Security Health Validator (WSHV) policy.
Answer: E
Explanation:
The Windows Security Health Validator (WSHV) provides settings that you can configure based on the requirements of your deployment. When you enable
requirements in the WSHV, client computers that do not meet all of these requirements are evaluated as noncompliant with the WSHV. Depending on settings in network policy and health policy, client computers that are noncompliant with the WSHV might have their network access restricted and be automatically remediated.

NEW QUESTION: 2
You are in a governance organization that has established a project management methodology with work product and document requirements that must be included in every project. You are doing an audit prior to a gate review for a specific project. You are fairly certain that the project manager and project are in compliance with these requirements, but you cannot see the required work products and documents in the project workspace. How can you solve this problem?
A. Go to a dashboard and look for the Work Products and Documents in a portlet.
B. Create a global activity code for required Work Products and Documents to call out activities.
C. Go to the Project section and click Work Products and Documents to view the portlet.
D. Go to Activities and search tor the Work Products and Documents by using an Activity view.
Answer: C
Explanation:
Before you can assign WPs and Docs, you must create them at the project level. On the left-hand toolbar, click on the icon to open up the WPs & Docs window
The WPs & Docs window is shown in the following screenshot:

Here you can add new documents to your project and categorize them.
Note: Work Products and Documents (WPs & Docs) allows you to provide documentation for the project. Examples include

material safety data sheets, punch lists, specifications, project manager notes and reports, product guides, and more. To add a document, choose Assign, and select the appropriate document. You may
