NEW QUESTION: 1

A company has Windows 10 Enterprise client computers. A client computer named COMPUTER1 has a shared folder named Folder1 located in the user's Downloads folder. Folder1 is shared only with employees in the Marketing department. All Marketing employees can connect to Folder1 from their client computers. A Marketing employee is unable to connect to Folder1 from a legacy device that is not compatible with the Windows 10 Enterprise default sharing settings. The device is able to connect to resources on other client computers. You need to configure COMPUTER1 to allow the device to connect to Folder1.

Which setting should you enable?

- A.** Turn off password protected sharing
- B.** Turn off network discovery
- C.** Turn on sharing so anyone with network access can read and write files in the Public folders.
- D.** Enable file sharing for devices that use 40- or 56-bit encryption
- E.** Use 128-bit encryption to help protect file sharing connections

Answer: D
