#### **NEW QUESTION: 1**

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012 R2.

On a server named Server2, you perform a Server Core Installation of Windows Server 2012 R2. You join Server2 to the contoso.com domain. You need to ensure that you can manage Server2 by using the Computer Management console on Server1. What should you do on Server2?

- A. Run sconfig.exe and configure remote management.
- B. Run the Disable-NetFirewallRule cmdlet.
- C. Run sconfig.exe and configure the network settings.
- D. Run the Enable-NetFirewallRule cmdlet.

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

As we can see on the following screenshot, Remote Management is enabled by default on a new Server Core installation of 2012 (so we don't have to configure it on Server2) BUT that's not enough as it only enables WinRM-based remote management (and computer management is not WinRM-based of course).

To enable the remote management from an MMC (such as server manager, or computer manager), we have to enable exception rules in the Firewall, which can be done, amongst other ways, using Powershell and the Enable-NetFirewallRulecmdlet.

Enable-NetFirewallRule

Detailed Description

The Enable-NetFirewallRulecmdlet enables a previously disabled firewall rule to be active within the computer or a group policy organizational unit. This cmdlet gets one or more firewall rules to be enabled with the Name parameter (default), the DisplayName parameter, rule properties, or by associated filters or objects. The Enabled parameter for the resulting queried rules is set to True.

#### **NEW QUESTION: 2**

- A. Option B
- B. Option D
- C. Option A
- D. Option C

**Answer: B**

Explanation:

Amazon SQS makes a best effort to preserve order in messages, but due to the distributed nature of the queue, AWS cannot guarantee that you will receive messages in the exact order you sent them. You typically place sequencing information or timestamps in your messages so that you can reorder them upon receipt.
