NEW QUESTION: 1

An application developer is creating a product selection ruleflow for an order processing application. The following rule tasks have been identified:

- *determine product eligibility
- *determine product compatibility
- *validate product

It is decided that an existing ruleflow will be reused for the rule task 'determine product eligibility'.

Which ruleflow element should the application developer select to add the existing ruleflow into the product selection

ruleflow?

- A. Select rule task, and under 'Rule Selection' pick all the rules of the existing ruleflow
- B. Select branch node, and pick the existing ruleflow
- C. Select rule task, and under 'Rule Selection' pick the existing ruleflow
- D. Select subflow, and select the existing ruleflow

Answer: D

NEW QUESTION: 2

- A. Callable
- B. ExecutorService
- C. Runnable
- D. Executor
- E. Thread
- F. Future

Answer: A,B,D

Explanation:

The java.util.concurrent package defines three executor interfaces:

*(F) Executor, a simple interface that supports launching new tasks.

*(A) ExecutorService, a subinterface of Executor, which adds features that help manage the lifecycle, both of the individual tasks and of the executor itself.

*ScheduledExecutorService, a subinterface of ExecutorService, supports future and/or periodic execution of tasks.

Typically, variables that refer to executor objects are declared as one of these three interface types, not with an executor class type.

D: The ExecutorService interface supplements execute with a similar, but more versatile submit method. Like execute, submit accepts Runnable objects, but also accepts Callable objects, which allow the task to return a value.

Reference: The Java Tutorials, Executor Interfaces

NEW QUESTION: 3

Refer to the exhibit. What is the problem when 237 dials 972551915?

- A. The problem is in "forward-digits 7"; the dial peer should be with "forward-digits 9."
