Answer :

Explanation:

Explanation

Box 1: Strong

Strong consistency offers a linearizability guarantee. The reads are guaranteed to return the most recent committed version of an item. A client never sees an uncommitted or partial write. Users are always guaranteed to read the latest committed write.

" Process reservations in the exact sequence as reservation are submitted to minimize overbooking or selling the same seat to multiple travelers."

Box 2: Enable-automatic-failover For multi-region Cosmos accounts that are configured with a single-write region, enable automatic-failover by using Azure CLI or Azure portal. After you enable automatic failover, whenever there is a regional disaster, Cosmos DB will automatically failover your account.

" Accept reservations even in network outages or other unforeseen failures"

Box 3: southcentralus " You provision a resource group named airlineResourceGroup in the Azure South-Central US region."
