NEW QUESTION: 1

An audit trail is an example of what type of control?

- A. Detective control
- B. Preventative control
- C. Application control

D. Deterrent control

Answer: A

Explanation:

The correct answer is Detective control. An audit trail is a record of events to piece together what has happened and allow enforcement of individual accountability by creating a reconstruction of events. They can be used to assist in the proper implementation of the other controls, however.
